# MOBILE MANUAL-WATER-CAN

## Kangloo

- + Simple plant watering with one push;
- + Big water tank (50 litres);
- + Long and bendable hose;
- + For less accessible areas;
- + With large wheels for faster and easier mobility;
- + Easy to fill;
- + Modern design, available in several colours;
- + For plants in gardens and balconies as well as for plants less accessible.

### 1. INSTRUCTIONS FOR USE AND WATERING:

Open the small lid on the water container and fill the container with pure water (50 litres). Close the lid. You can now begin with watering. Hold the holder of the Kangloo watering-can during watering with your left or right hand. Inside the housing of the Kangloo-water can a manual water pressure pump is integrated. While pulling out the pump lever, the cylinder of the water pump gets filled with water. If you push the pump handle back down, you relieve the water into the hose. You can regulate the amount on the with the pump lever. The more you pull the lever, the greater is the amount of water.

### 2. BEFORE EACH APPLICATION OF THE KANGLOO-WATER-CAN you have to:

- read the operating instructions and take them into consideration;
- make a visual test of the Kangloo-water-can and check whether the water tank is sealed;
- assure that all parts of Kangloo water-can are in good condition;
- assure that the work with the Kangloo water-can is not unsafe for anyone;
- assure that there is no fire or sparks near you.

### 3. HANDLING:

The Kangloo water-can may be used only by one person at time. The person watering with the Kangloo-Water-Can has to hold the holder of the Kangloo-Water-can during watering with her/his left or right hand. The wheels are meant for easier moving the Kangloo-Water-can.

### 4. SAFETY WHILE USING THE KANGLOO-WATER-CAN:

The Kangloo water-can shall be operated only by a capable person, who also read the manuals. Do not position the Kangloo-Water-Can horizontally or overturn it.

### 5. NOTE:

Assure when filling the Kangloo-water can, that the water is clear and pure and without larger suspended solids or particles. You may also add some liquid fertilizer.

### 6. GENERAL MAINTENANCE:

For cleaning the Kangloo-Water-can use cleaning detergents, which are intended for use in food industry. If the water pump gets blocked, remove it from the water tank and clean it. After you clean the water pump, insert it back into the water tank just as it was: always straight. It must not be inserted inclined!

### 7. TRANSPORTATION AND STORAGE:

The total weight of Kangloo-water can is 58 kg. The Kangloo - water can has two rubber wheels for easy transporting. According to the Occupational Health and Safety Act applying to the manual transfer of loads male subjects aged 19-45 years are allowed to lift and carry the burden of a maximum weight not exceeding 55 kg. Manually therefore the Kangloo-water can may be lifted and transferred, if necessary.

Before a longer storage it is necessary to clear the Kangloo - water-can with a cloth and empty the water tank.
